HARDENED FLIGHTS

METAL-CAST GUIDES

Each upright is captured in the top and bottom tracks with steel roller bearings and metal-cast forks. All Alphadors have steel sleeves inside the uprights, strengthening the cross bracing fixtures.

Alphadors are finished by hand and made from high quality materials. All steel parts are chemically treated and galvanised.

PATENTED LOCK

Alphadors have unique Dutch bends on all channel edges which gives greater strength to the product as compared to other products on the market.

The face of the door has no pop rivets exposed and the product makes no use of moving nylon parts. It has a clean exterior look which adds to the attractiveness and strength. Each Alphador is fitted with Magnador's stainless steel slamlock with auto-deadlock for superior strength and ease of use.

Our most affordable
sliding security gate!

This single upright trellis gate offers value for money, whilst insuring adequate protection.

For extra strength, our gates are fitted with temper-rolled hardened cross flights bracing. The Budgetdor is fitted with a conventional slamlock for ease of use.

Our trellis gates are custom-made to your individual requirements to ensure a neater and secure fit. They can also be equipped with Magnador's stainless steel slamlock with auto-deadlock.

Swing Gates

All our gates are hot-dipped galvanised and are custom-made to your individual requirements. They are then powder-coated with an exterior polyester powder-coating, giving the product a scratch- and fade-resistant finish.

Each gate comes with a security latch lock and is fitted with a stopper plate. Thick bullet-nose hinges are used to fasten the gate to the wall using thick snap-off security bolts.

Various designs and colours are available to choose from. We also provide custom colours upon request.

DRIVEWAY GATES & PANELS

Our driveway gates and panels offer you a stylish yet secure addition to your home.

Only quality parts and materials are used to ensure a top quality finished product.

Various designs, specifications and colours are available.

Each driveway gate and panel is custom-made to your specifications to match your property's style with galvanising and pure polyester powder-coating as standard issue.

(Only available in Cape Town.)

ROLLER Shutters

- Each aluminium roller shutter is custom-built to best fit the opening whether it be a patio, passage, window or more.
- With varied slat options we are able to enclose openings up to 8m wide.
- We offer easy operation with remote control, or home automation for motorised units, and for the lighter, smaller units a crank handle for manual operation (lockable bottom bar is optional).
- Manual override or power backup gives peace of mind during power failures or load shedding.
- **Ask about our hurricane-tested aluminium roller shutter models.**
- **We can install inside your home without taking away from your design, comfort or space.**
- Profiles available include extruded double walled in 40mm, 45mm, 61mm, 77mm and 95mm, with a single skin 78mm profile. We also proudly offer extruded punched and microperforated profiles as well as various roll-formed [foam-filled] profiles.

LOUVRE Shutters

- Shutters are accepted as a security barrier by most insurance companies.
- Secure locking pin of up to 65mm both top and bottom to maximise security.
- Each integrated reinforced designed louvre, is secured with long galvanised steel screws to the shutter frame to provide ultra-strength.
- Security version & lite version available.
- Manufactured locally with quality-assured materials.
- Available in 5 colours: White, Dark Grey, Light Grey, Bronze & Charcoal.

Magnador's Aluminium Security Louvre Shutters offer all the functional benefits of both burglar proofing and light control, all in one beautiful combination.

The 35mm frame, reinforced louvres and attention to quality fixings, reinforces the security offering. Boasting an industry leading powder coating, array of design options and easy operation, Magnador Security Shutters add value to one's property together with convenience and aesthetic appeal.
