

"Strength that you can trust."

No room for aluminium
when steel is 3x denser!

Strong steel 12mmx25mm horizontal burglar bars. More vertical support bars used for creating a cottage pane square grid in line with existing window panes. The bars are secured to the concrete wall with a unique steel anchor pin which is secured in place with a two part epoxy chemical resin. Exclusive collar ends are used for plaster installations for a neater finish, no collars needed for wooden frame installations. Our cottage pane burglar bar system offers a neat and secure physical barrier once fitted.

COTTAGE PANE BURGLAR BARS
